Business Card Ordering Guide

*To get started, use the **Business Card Generator** in the Casa Blanca Creative Studio to generate and download your business card designs. You'll receive print-ready front and back images to upload below.*

Step 1 — Open the MOO Luxe card page

Luxe is the recommended stock — the thick, premium card that best represents the brand.

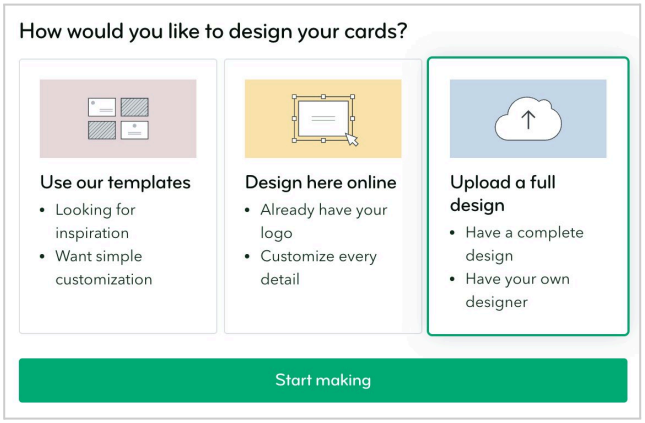

Step 2 — Choose your options

- Size — **Standard (2.0" x 3.5")**
- Corners — **Square**
- Seam color — we recommend **Polar White** or **Raven Black**, but it's optional; choose any color.

Recommended selections highlighted in green.

Step 3 — Choose how to design your cards

When MOO asks **"How would you like to design your cards?"** choose **"Upload a full design,"** then click **Start making**.

Step 4 — Upload your card files

Upload the front and back graphics you received from the creative team.

Note: MOO's upload area shows a landscape card by default. That's fine — upload your portrait (vertical) Casa Blanca images as-is; MOO auto-detects the orientation and updates the preview.

Step 5 — Review and order

Check the on-screen preview against your files. **We recommend ordering 50 for your first order.** Quantity is your choice — MOO's per-card price drops at higher volumes.
